Professional Summary

Graduate Computer Science student with leadership and program operations experience in a university environment, supported by professional full stack development work. Proven ability to supervise teams, coordinate logistics, communicate with stakeholders, and maintain structured, safe learning spaces. Passionate about technology education, mentorship, and creating engaging, well-managed experiences for students and teens.

Leadership & Program Operations

Nepalese Students Association (NeSA), University of South Florida

Tampa, FL

Event Manager / Executive Member

2024 – Present

- Plan and execute on-campus programs and events for **50–200+ student participants**, managing scheduling, staffing, setup/teardown, and day-of operations.
- Supervise and coordinate **5–15 volunteers and staff members per event**, assigning roles, tracking responsibilities, and resolving issues in real time.
- Serve as a primary point of contact between students, university staff, and external partners to address concerns and ensure smooth program execution.
- Maintain a safe, welcoming environment by monitoring participant behavior, managing crowd flow, and ensuring appropriate supervision throughout activities.
- Monitor participant well-being during events and escalate concerns in alignment with university policies and expectations.

Technical & Instructional Experience

Full Stack Web Developer

Tampa, FL

React, AngularJS, .NET Core

2023 – 2024

- Developed and maintained full stack web applications using React, AngularJS, and .NET Core in a structured, deadline-driven environment.
- Collaborated within cross-functional teams using organized workflows, clear documentation, and regular communication.
- Explained technical concepts and application behavior to non-technical stakeholders in a clear, approachable manner.

Education

University of South Florida (USF)

Tampa, FL

Master of Science in Computer Science

In Progress

Certifications

- Adult & Pediatric CPR / First Aid / AED — *Scheduled (to be completed prior to first day of camp)*

Youth Education Fit

- Comfortable explaining technical concepts to beginners in an engaging, age-appropriate manner.

- Demonstrates professionalism, patience, and clear boundaries in student-facing environments.

Skills

Leadership & Ops	Team supervision, scheduling, logistics coordination, stakeholder communication, conflict resolution
Safety Mindset	Structured supervision, risk awareness, incident escalation discipline, policy adherence
